

# INSTALLATION INSTRUCTIONS

## Installation Procedure

1. Flush out the pipe work to remove debris and then ensure that the water supply is turned off.
2. Refer to diagram and check that all components are present.  
O-ring is in the metal base.
3. Screw the thread support into the mixer body.
4. Place the mixer onto the mounting hole. Underneath the mounting hole, feed the washer and lock nut onto the thread rod.  
Firmly fasten the lock nut.
5. Connect the flexible hoses into the thread support and tighten it.
6. Connect the water supply to the flexible hose. Hot supply should always be connected to the left hose.
7. Fully open mixer on both hot & cold sides & allow water to run for approximately one minute to further flush the system.
8. Check all connections to ensure there are no leaks.

## Aftercare

Daily cleaning and care are required in order to keep the product shining and properly working.

Please clean the product with water, gentle liquid or glass cleaner and dry it with soft cloth.

Do not use acid cleaner and abrasive material.

## Basin Mixer Installation
