Blum's drilling and insertion machines ensure that you can drill holes into cabinets, doors and fronts quickly, precisely and with the utmost ease - no matter whether you're using a MINIPRESS P or a MINIPRESS PRO. Fitted or retrofitted with EASYSTICK, these assembly devices become perfect assistants: they shorten set-up times, increase flexibility and guarantee high precision drilling.

Ready, steady, drill!

EASYSTICK incorporates a computer so for the first time you will be able to enter settings directly into the machine. Choose the right box system, select the motion technology and drawer side height you need and EASYSTICK will automatically calculate the right drilling positions.
