

MOVENTO

MOVENTO represents the evolution of motion at Blum. As the elite concealed runner system created to meet the highest expectations, MOVENTO offers synchronised smooth running action as well as new adjustment options. MOVENTO runner technology provides a more precise runner movement. Thanks to integrated BLUMOTION drawers and pull-outs always close silently and effortlessly. SERVO-DRIVE or TIP-ON opening support systems are available for handle-less design providing easy opening with just a light touch.

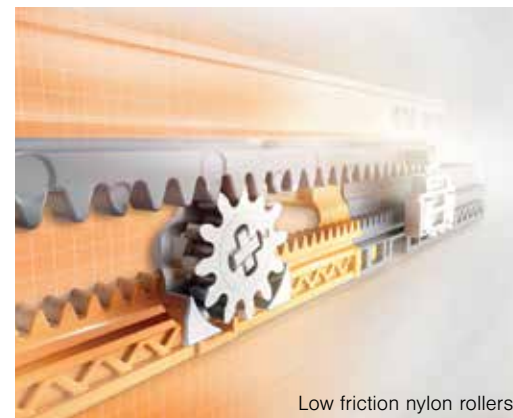

The evolution of motion

MOVENTO is the perfect solution for timber drawers when the runner system is required to match the beauty of the furniture construction. The MOVENTO concealed runner system opens up many exciting design options. Low opening forces, improved sag values and synchronised smooth running action in combination with BLUMOTION achieves an entirely new unique comfort of motion for the furniture user. The superior runner smoothness and top quality design make it ideal for the high demands of everyday kitchen or furniture use such as the storage of heavy items and frequent opening and closing.

Advantages of MOVENTO

- Smoother running action due to improved synchronisation between the drawer profile and drawer carriage with low friction nylon runners.
- Low opening forces, high stability and improved sag values.
- Dynamic carrying capacity of 40kg and 60kg. Flexibility in drawer dimensions - drawers and pull-outs can be made to fit the available cabinet space.
- An exact gap design is ensured with 4-dimensional front adjustment (height, side, tilt and depth).
- Optional side stabilisation.
- Drilling pattern and fixing positions of the cabinet profile are uniform for the entire programme.

Low friction nylon rollers

New 4-dimensional front adjustment

With MOVENTO, the front can be adjusted to the side and in the depth along with the height and tilt. Depth adjustment is optional for furniture with inset fronts. Precise gap alignment can be achieved quickly, easily and tool-free with no additional drawer modifications, optimising manufacturing and installation time.

Depth Adjustment

Design options

- Nominal lengths from 270mm – 600mm available for both standard drawer applications and inner drawers. Height and width of drawers is flexible to the cabinet space available.
- Extra-wide front applications are possible by attaching one long front onto two drawers.
- Handle-less designs are possible when combined with SERVO-DRIVE or TIP-ON opening support systems.

Motion Technologies

BLUMOTION

With BLUMOTION, drawers and pull-outs close silently and effortlessly regardless of how much force is used or how heavily laden they are. The technology adapts itself to the size, weight and speed of the closing furniture. BLUMOTION is integrated into the MOVENTO runner.

SERVO-DRIVE

With SERVO-DRIVE electrical motion support system, a light touch on the handle-less fronts or a gentle pull on the handle triggers the opening impulse. SERVO-DRIVE can be deactivated whilst furniture remains fully functional. The MOVENTO runner with integrated BLUMOTION is compatible with SERVO-DRIVE enhancing comfort and freedom of motion.

TIP-ON

With TIP-ON mechanical opening support system, a gentle push on the front is enough to open handle-less drawers and pull-outs providing functional opening comfort. Furniture closes securely with the TIP-ON latching function with a soft push. An alternative MOVENTO runner is available with integrated TIP-ON technology.

NB: TIP-ON cannot be used in combination with BLUMOTION soft close

MOVENTO with BLUMOTION & SERVO-DRIVE

Innovation

Blum is one of the largest patent applicants in Austria and has more than 1,000 registered trademarks today.

CLIP, tool-free assembly, TANDEM technology, MOVENTO technology, soft-close BLUMOTION and the SERVO-DRIVE electrical opening system are all innovations by Blum and milestones in the furniture manufacturing industry.

We want our fittings solutions to be innovative and make everyday kitchen use easier. That's why our developments are based on findings from requirements research and input from our customers. Blum's innovative solutions all stem from our great sensitivity to our customers' needs. This is true for our products, services and processes.

Emotion, design, function – Every innovation should not only bring about functional improvements but should also consider emotional and design aspects. Design is therefore an integral part of every development.

True progress – For the purpose of global customer benefit our innovations must offer real advantages. To achieve this we always ask ourselves the question “under these conditions would I buy this product or service?”

Blum will continue to be an innovative force in the future keeping its customers at the forefront of the industry.

Quality for the lifetime of the furniture

Our goal is to ensure that our fittings systems provide comfort and function to furniture buyers for as long as the furniture is used. All Blum products are engineered to provide problem-free-use of the furniture during its lifetime, which is considered to be about 20 years. We achieve this goal by using the strictest internal guidelines that are the basis of our ISO9001 quality management system. We also use our own testing laboratory in conjunction with other external testing organisations to monitor the quality of our products on a regular basis and observe how they are used in daily activities.

Non-electrical components are covered by a lifetime warranty.

The warranty period for electrical components when used with Blum products is 5 years.
